Naga Visala Sreeja Akella

Melbourne, VIC | [Phone] | [Professional email] | [LinkedIn URL] | github.com/sreejaakella

CAREER PROFILE

Data analyst with two years of software development experience, skilled in **SQL**, Power BI and Python. Seeking a graduate or junior Data Analyst role in Melbourne.

TECHNICAL SKILLS

- **Data analysis:** Data cleaning, exploratory analysis, KPI and trend analysis, business reporting
- **SQL and databases:** MySQL, PostgreSQL; joins, subqueries, CASE statements, aggregations
- **Visualisation and BI:** Power BI, DAX measures, Power Query, Excel dashboards, PivotTables, slicers
- **Programming:** Python (pandas, NumPy), Java (Spring Boot, REST APIs)
- **Tools:** Git, GitHub, MySQL Workbench

DATA ANALYTICS PROJECTS

Hospital Healthcare Management Dashboard | Power BI, DAX, Power Query, Excel | GitHub

- Built a five-page interactive Power BI dashboard from 2,506 patient records across 10 departments, using 12 DAX measures and slicers for month, department, gender, patient status and patient type.
- Modelled four linked tables (patients, departments, 262 staff, 2,847 beds) and cleaned the data in Power Query.
- Found that Rehabilitation accounted for 393 of 493 readmissions (80%) and 52 of 86 deaths, and recommended a review of discharge and follow-up care.
- Found that 8% of patients with treatment costs over 500 generated 38% of total cost.
- Delivered a seven-page findings report with six prioritised recommendations on peak-month capacity, long-stay beds and low-satisfaction departments.

Hotel Revenue Analysis (AtliQ Grands) | SQL, Python (pandas), Excel | GitHub

- Analysed 134,590 bookings across 25 hotels in four cities (May–July 2022) using 21 SQL queries with joins, subqueries and CASE statements.
- Quantified a revenue gap of about 15%: INR 200.75 crore generated versus INR 170.88 crore realised, with a 24.8% cancellation rate and 5% no-shows.
- Compared pricing, occupancy, room mix and ratings. AtliQ Seasons had the highest average rate (INR 16,606) but the lowest revenue and a 2.29/5 rating, pointing to service quality as an area to investigate rather than pricing.
- Cleaned data in pandas and produced a PDF findings report and dashboard mock-up for a revenue team.

Australia Data Science Job Market Analysis | MySQL, Excel (PivotTables, slicers) | GitHub

- Analysed 3,902 SEEK job listings (February 2019 – January 2022) in MySQL and built an Excel dashboard with six KPI cards, nine charts and four slicers.
- Found that Sydney and Melbourne made up about 70% of listings, 77% of roles were full-time and Python appeared in about 90% of listings.
- Tracked skill trends: R fell from 77% of listings in 2019 to 46% in 2022, while SQL reached 92% in 2021.
- Found salary disclosed in only 39% of listings, with government roles (63%) more likely to disclose than private-sector roles.

WORK EXPERIENCE

Java Developer | Aeologic Technologies | July 2024 – September 2026

- Gathered and analysed requirements for services in the NRTS application using Java, Spring Boot and **SQL (PostgreSQL)**.
- Built and maintained REST APIs for user login, registration and form handling using Spring Data JPA with **SQL databases (MySQL/PostgreSQL)**.
- Designed and implemented Form Designer, a web-based form builder using Spring Boot and Thymeleaf, with multi-language support, version history, validation rules and payment integration.

EDUCATION

Master of Data Science | Deakin University, Melbourne, Australia
Expected completion: June 2028 | 35% scholarship recipient

Bachelor of Engineering (Computer Science) | Osmania University, India
CGPA: 8.23/10
